
Superstore Sales Dashboard: How to Read It

1. Purpose
This dashboard gives a quick view of how the Superstore business is performing. It breaks sales down by product category, region, and month so a manager can spot strong and weak areas without digging through raw data.

2. Key Numbers (top of the dashboard)

- **Total Sales:** the total value of all orders
- **Profit:** the total money earned after costs
- **Units Sold:** the total number of items sold
- **Profit Margin:** profit as a percentage of sales (for every 100 rupees of sales, how much is profit)

3. Charts

- **Sales by Category:** compares Furniture, Office Supplies and Technology to show which sells the most
- **Sales by Region:** compares Central, East, South and West to show the top-performing region
- **Monthly Sales:** a line chart showing how sales rise and fall across months and years

4. How to Use the Filters

- Click a button in the **Region** or **Month** slicer and the charts and KPIs update to match
- Hold **Ctrl** and click to select more than one option
- Click the small **clear filter icon** at the top-right of a slicer to reset

5. What I Found in the Data

- The **West** region has the highest sales (about 739,813), while **South** is the lowest (about 391,722).
- **Technology** is the top category (about 839,893), ahead of Furniture and Office Supplies.
- Monthly sales go up and down, but they peak toward the end of each year, around **November and December**. [Check this on your Monthly chart and change it if your chart shows something different.]
- The overall profit margin is about **12.6%**.
